

Blue Sea Line Shipping LLC

SHIPPING AND CHARTERING SINCE 2015, AND THE DIGITAL SHIPPING PLATFORM WE ARE BUILDING NEXT.

Shipping and chartering today. The digital shipping platform next.

Blue Sea Line Shipping LLC moves bulk cargo, charters vessels and manages ships from Dubai. We are now building Blue Sea Line, a digital marketplace that matches cargo to ships and carries freight from negotiation to delivery.

"Connecting Cargo. Empowering Shipping."

9M+

tons of cargo transported worldwide

696

cargo transportation and operation projects completed

7

owned and chartered vessels in operation

2015

the year we began in maritime trade and transport

63

experts in trade and maritime transport

Blue Sea Line connects shipbrokers, carriers, freight forwarders and traders through an intelligent digital shipping platform: find freight solutions, publish open fleet positions, negotiate freight, search shipping opportunities, manage cargo and fleet data and talk to maritime professionals, all in one place.

Who we are

Blue Sea Line Shipping LLC has chartered bulk and general cargo in the Persian Gulf, India and East Asia trades since 2015. The platform grows out of that desk: a digital shipping and chartering environment built by people who fix ships every week.

Our vision

To become a leading intelligent digital platform for the global maritime industry: connecting shipping markets, optimising maritime operations and redefining the future of digital shipping and chartering.

Our mission

To empower the maritime industry through AI-driven technology, intelligent freight solutions and integrated digital services that make shipping more efficient, transparent, accessible and cost-effective.

What we do today

Shipping and chartering, run by our own team, worldwide.

Executive bulk shipment

Dry and liquid bulk moved end to end: vessel, loading, voyage and discharge under one contract.

Ship management

Technical and commercial management that keeps vessels compliant, crewed and earning.

Project handling

Heavy lift and project cargo planned from stowage to delivery.

Vessel chartering

Voyage and time charters matched to your cargo, route and laycan, negotiated on your behalf.

Shipping agency

Port calls, clearances and local formalities handled for owners and operators.

What the platform enables

One integrated environment for maritime transport, shipping and chartering: cargo and vessel opportunities, freight negotiations, chartering workflows, maritime data, digital documents and shipping communication.

- Find freight solutions and shipping opportunities.
- Conduct freight negotiations with confirmed counterparties.
- Store and manage cargo and fleet data in one record.
- Publish and discover open fleet positions.
- Search for the vessel or the cargo that fits.
- Communicate with maritime professionals and counterparties.

Our core values

Innovation Advancing maritime transport through digital technology and AI.	Transparency Clear communication, reliable information and open commercial processes.	Efficiency Optimised shipping operations and better decisions.	Connectivity Maritime stakeholders brought together on one platform.	Reliability Dependable shipping solutions through intelligent tools and integrated services.
--	---	--	--	--

The platform roadmap

Modules are built in order of priority; each needs its data provider, access rights and integration work before it opens.

Priority A, essential Live vessel tracking (AIS), container tracking by container number, route planner with ETA and CO2, and the developer API.	Priority B, suggested Bunker price monitor and digital charter party drafting (smart contracts).	Priority C, complementary Port intelligence: port, owner and vessel analytics.
--	--	--

The Blue Sea Line platform

A digital shipping marketplace for freight trading and contract management. Features open in stages, and early access members use them first.
